

Audurra Pumpspraybottle

Description:

Pressure build-up in the liquid container by pumping. A mere push on the spray button ensures an even and constant mist, which can be regulated by turning the nozzle nut.

The Audurra logos are printed on both sides of the Compressed Air Sprayer to offer sufficient space in front of the bottle to add a label indicating which liquid is used in the bottle, e.g. silicon remover..

Features;

- Compressed air sprayer with VITON O-ring
- Fill quantity: 0,9 l max
- Shapely and technically advanced device for spraying large quantities of liquid
- Operating pressure: 3 bar / safety valve
- Nozzle: plastic Ø 0,8 mm
- Marking for indication of the maximum recommended fill content as well as a division into common mixing ratios: 1:10 (10%), 1:20 (5%) und 1:50 (2%)
- Only 3,5 turns are needed to open and close the bottle

Audurra Pumpspraybottle

Product variations:

Value Pack

The Value Pack which is available in limited edition includes 3 bottles, 2 sets of colored coding caps and 1 set wall brackets for compressed air sprayers for the identification and differentiation of fluids. These coding caps

- enable a clean and ordered working environment
- are suitable for the whole range of pressure sprayers
